

Outpost™ RT Battery

Ideal for traffic and ITS extreme temperature applications

Overview

The Outpost-RT is the newest addition to the Outpost Series of batteries. The battery is designed for deep cycle, extreme temperature applications. The battery is ideal for traffic and ITS applications meeting the NEMA operating temperature range of -40°C to +74°C (-40°F to +165°F).

The Outpost-RT is a maintenance free, sealed non-spillable AGM lead acid battery. The battery is available in 12 Volt, 55 Ampere-Hour (AH) rating.

Like the other batteries in the Outpost™ series, it is proudly made in the U.S.A.

Configurations

Model	Voltage (nominal)	AH Capacity (20 hr rate)	Weight per Battery lb (kg)	Overall Dimensions		
				Length in (mm)	Width in (mm)	Height in (mm)
OPB-RT-1255	12 V	55 Ah	37 (16.8)	9.6 (244)	5.47 (139)	9.24 (235)
